

BOOK EDITING

CASE STUDY: CHILDREN'S BOOKS COLLABORATION

OVERVIEW

Dr John Paul Wijnberg is an African doctor and father with over thirty years of hands-on international clinical experience. His stories passionately strive to boost and encourage children to tap their true potential and find beaming smiles within their hearts.

"Good stories, love and laughter are great natural medicines..."
— Dr. John Paul Wijnberg

APPROACH

John used his own 'dark night of the soul' to inspire children through fictional stories with deep life-lessons. In his children's story book series, John takes his little readers on exciting adventures through some of the challenges of growing up, believing in oneself, and addressing the fear of failure.

John's Goal

It didn't take John long to appreciate how much better writing made him feel. He used it to channel hidden emotions and thoughts onto paper and share it with others, albeit only to a handful of curious readers.

As an already-published author, John already had a team in place to help with the technical aspects of his books. However, he felt the need for a second set of eyes. John reached Lizette through an internet search when he needed someone who was committed to providing timely, affordable, and high quality services.

Find a Team You Know, Like, and Trust

In today's tech-savvy world, most services can be outsourced to specialist freelancers. Because John was born in South Africa, he was comfortable hiring Lizette. They have only communicated via email throughout their various transactions.

"Lizette is personable, caring, and thoughtful. She responded in a very timely manner AT ALL TIMES... considering we were in different parts of the world. She took genuine interest in my book," John explains.

CONCLUSION

After their first project together, John enlisted Lizette a few more times. He explains, "I am happy with what I receive... Dedication and very high quality services!"

John's books are available at BaliBuku and on Amazon and are a fantastic series to add to your little reader's bookshelf.
